THE EDGE IN
POULTRY
PERFORMANCE

Hubbard Edge: the edge in poultry performance!

The latest R&D techniques have been applied to enhance breeder and broiler performance, ensuring the Hubbard Edge meets and exceeds customers' expectations.

The Hubbard Edge represents the perfect combination of advanced breeder and broiler performance. Customers can expect high egg and chick numbers, strong broiler growth rates with excellent health, and a significant output of high-quality, saleable meat. Additionally, outstanding feed efficiency delivers economic advantages for producers while promoting environmental sustainability.

The Hubbard Edge female combines the key traits the industry demands into one versatile bird, delivering exceptional performance and economic efficiencies across all stages of production, particularly in the growing small bird fast-food sector.

BREEDER LEVEL		
Bodyweight at 20 weeks	2250 – 2327 g	4.96 – 5.13 lbs
Bodyweight at 64 weeks	4147 – 4312 g	9.14 – 9.51 lbs
TE/HH at 64 weeks	181.8	
HE/HH at 64 weeks	174.7	
Average hatch at 64 weeks	85.6%	
Chicks/HH at 64 weeks	149.6	

BROILER LEVEL			
AGE	LIVEWEIGHT (as hatched)		FCR
28 days	1 685 g	3.53 lbs	1.28
35 days	2 383 g	4.99 lbs	1.38
42 days	3 098 g	6.48 lbs	1.51
49 days	3 789 g	7.93 lbs	1.64

FCR adjusted to 2.5 kg / 5.5 lbs = 1.405
